

2022 – 2023 DEGREE WORKSHEET
Bachelor of Science in Computer Science

The Bachelor of Science Degree in Computer Science obtained through the Computer Science & Engineering Partnership Program is conferred by the University of Colorado Boulder. Lower-division coursework is completed through Western Colorado University before applying for admission to the University of Colorado Boulder. The entire program is completed on the campus of Western Colorado University. A student may apply for admission to the Western-University of Colorado Boulder Partnership Program when they have satisfied all criteria of one of the following scenarios:

Scenario One

- Complete a college-level, two-course sequence in calculus with a grade of “B-” or higher
- Complete one college-level physical science course (calculus-based physics and/or college chemistry) with a grade of “B-” or higher
- Maintain a cumulative GPA of 3.0 or higher

Scenario Two

- Complete the course sequence listed on the current Program Sheet/Degree Plan for the first and second years
- Maintain a college cumulative GPA of 3.0 or higher

Student Outcomes. Graduates of this program will have an ability to...

1. analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions
2. design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline
3. communicate effectively in a variety of professional contexts
4. recognize professional responsibilities and make informed judgements in computing practice based on legal and ethical principles
5. function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline
6. apply computer science theory and software development fundamentals to produce computing-based solutions

Program Educational Objectives

The Computer Science program is designed to prepare students for successful careers having positive societal impact in industry, academia, government, and consulting. Our alumni are expected to:

- Apply their engineering and computer science knowledge, critical thinking, creativity, and problem solving skills with integrity and inclusivity in a professional practice or in non-engineering or technical fields, such as law, medicine, or business.
- Continue their intellectual development through graduate education, professional development courses, self-directed investigation, and/or on-the-job training and experience.
- Embrace leadership and collaborative roles in their careers.

2022 – 2023 DEGREE WORKSHEET
Bachelor of Science in Computer Science

The Bachelor of Science Degree in Computer Science requires:

- [Transfer](#) of all coursework listed on the plan of study to the University of Colorado Boulder
- At least 45 credits earned from the University of Colorado Boulder ([residency requirement](#))
- A [minimum of 128 credits](#) earned to degree program
- Student knowledge and adherence to course prerequisites as listed in the course catalog
- A cumulative and major [GPA of at least 2.00](#) (from entirely CU Boulder coursework as a student's Western GPA will not continue in the CU portion of the program)
- Satisfactory completion of all [Minimum Academic Preparation Standards \(MAPS\)](#) deficiencies

AP & IB Credit

Partnership students are to adhere to [CU Boulder standards for AP and IB Scores \(not Western standards\)](#). These scores are often higher than the score required for credit from Western (particularly those listed below).

- An AP score of 5 is required on **Physics C: Mechanics** to receive credit for General Physics I (4 credits) at CU Boulder (CU PHYS 1110, Western PHYS 200).
- An AP score of 5 is required on **Physics C: Electricity & Magnetism** to receive credit for General Physics II (4 credits) at CU Boulder (CU PHYS 1120, Western PHYS 201).
- An AP score of 4 or higher is required on **Calculus AB** to receive credit for Calculus I (5 credits) at CU Boulder (CU MATH 1300, Western MATH 151)
- An AP score of 4 or higher is required on **Calculus BC** to receive credit for Calculus I (5 credits) and Calculus II (5 credits) at CU Boulder (CU MATH 1300 and 2300, Western MATH 151 and 251)
 - Additionally, a **Calculus BC** score of 3 or higher with an AB sub score of 4 or higher is required to receive credit for Calculus I (5 credits) at CU Boulder (CU MATH 1300, Western MATH 151)
- An AP score of 5 is required on **Chemistry** to receive credit for General Chemistry I with lab (5 credits) at CU Boulder (CU CHEM 1113 and 1114, Western CHEM 121)
- An AP score of 5 is required on either **Computer Science A** or **Computer Science Principles** to receive credit for Computer Science 1 (4 credits) at CU Boulder (CU CSCI 1300, Western CS 191)

MAPS (Minimum Academic Preparation Standards)

MAPS content areas are usually fulfilled by high school coursework, but sometimes students have to address "MAPS deficiencies" with their college coursework. Typically, one unit equals one year of high school study or one semester of college course work. For engineering students, those who experience a MAPS deficiency most often need to take additional foreign language and/or social science courses. The good news is that these courses can do "double duty" by fulfilling MAPS as well as humanities/social sciences requirements. The MAPS requirement for foreign language is:

2 units in a single foreign language

What this requirement means is that students must demonstrate written and oral language proficiency through the *second-level* of a single foreign language, where *second-level* means a second full year of high school or a second semester college course (e.g., SPAN 1020 Beginning Spanish 2).

The MAPS requirement for social science is 3 units (at least one which must be U.S. or world history).

The full policy on MAPS can be found on the [CEAS Degree Requirement website](#).

2022 – 2023 DEGREE WORKSHEET
Bachelor of Science in Computer Science

REQUIRED COURSES

Western coursework is in red font, while CU Boulder coursework is in black font.

College Writing Requirement: 3 credit hours

ENG 302 Technical Writing 3

Humanities and Social Sciences: 15 credit hours, 6 of which must be upper-division

Upper-division Humanities & Social Science:

Remaining (lower-division) Humanities & Social Sciences:

Logic and Ethics: 6 credit hours

PHIL 135 Introduction to Ethics 3

One of the following:

PHIL 100 Critical Thinking 3

PHIL 200 Symbolic Logic 3

Mathematics: 17 credit hours

MATH 151 Calculus I 4

MATH 200 Discrete Mathematics 3

MATH 251 Calculus II 4

MATH 314 Probability/Statistics 3

CSCI 2820 Linear Algebra with CS Applications 3

Natural Science: 17 credit hours

PHYS 200 General Physics I w/ lab 4

Natural Science Sequence (one of the following):

PHYS 201 General Physics II w/ lab 4

BIOL 150 Bio Principles w/ lab 4

CHEM 111&112 General Chem I w/ lab 4

CHEM 121 General Chemistry for Engineers 3

Additional Natural Science hours to reach 17 hours 9-10

Computer Science: 58 credit hours

Computer Science Foundation

HWTR 100 CS-based Headwaters 1

CS 191 Computer Science II 3

CS 280 Data Structures 3

CS 330 Operating Systems and Architecture 3

CS 370 Systems Programming in C 3

CS 412 Software Engineering 3

CSCI 3155 Principles of Programming Languages 4

CSCI 3104 Algorithms 4

Computer Science Core

5 courses from the following:

CSCI 3002 Fundamentals of Human Computer Interaction 4

CSCI 3202 Introduction to AI 3

CSCI 3287 Design & Analysis of Data Systems 3

CSCI 3302 Introduction to Robotics 3

CSCI 3403 Intro to CyberSecurity for a Converged World 4

CSCI 3434 Theory of Computation 3

CSCI 3656 Numerical Computation (or approved substitution) 3

CSCI 3753 Design & Analysis of OS 4

CSCI 4022 Advanced Data Science 3

CSCI 4273 Network Systems 3

CSCI 4448 Object-Oriented Analysis and Design 3

Computer Science Electives

Additional upper-division CSCI courses to bring total computer science hours to 58 or higher

Senior Capstone

CSCI 4308 Software Engineering Project I 4

CSCI 4318 Software Engineering Project II 4

Free Electives: Credit hours variable

Complete enough electives to bring the total credit hours toward the degree to 128. Normally this is 12 credit hours but could vary (for example due to transfer credits). Please consult with your academic advisor with questions.

TOTAL CREDITS

128

2022 – 2023 DEGREE WORKSHEET
Bachelor of Science in Computer Science

ADDITIONAL DEGREE INFORMATION

Acceptable Course Substitutions:

CHEM 111 + 112 (General Chemistry 1 with lab, 4 credits) for CHEM 121 (General Chemistry for Engineers, 3 credits). To investigate additional course substitutions from Western or another institution, check www.transferology.com to verify how applicable courses will transfer to CU Boulder and discuss options with an Academic Advisor.

Approved Humanities & Social Sciences

At least 15 credit hours in [humanities and social sciences](#) are required in order to graduate. A list of acceptable humanities and social sciences with Western can be found on the “Humanities and Social Science Requirements” PDF.

Natural Sciences

A total of at least 17 credit hours of natural sciences are required, with options at Western as follows:

- PHYS 200 General Physics (with lab, 4 credits)
- One additional Natural Science Sequence from the following: PHYS 201 (4 credits), BIOL 150 (4 credits, **will not apply** to partnership admission guidelines), CHEM 111&112 (4 credits), or CHEM 121 (3 credits)
- A minimum of 9 additional Natural Science credit hours from the following: BIOL 130 (3 credits), BIOL 135 (1 credit), BIOL 150 (4 credits), CHEM 111&112 (4 credits), CHEM 113&114 (4 credits), CHEM 121 (3 credits), GEOL 101 (3 credits), GEOL 105 (1 credit), GEOL 201 (4 credits) or PHYS 320 (3 credits)
 - A list of additional course options in Boulder can be found on the main campus [CS Degree Plan Natural Science Elective Course List](#)
 - Students may petition to count courses not on the above list as natural science credit and should first consult their Academic Advisor

Headwaters 100

To fulfill the CU Boulder CSCI 1000 (Computer Science as a Field of Work and Study) requirement, Western partnership students must take a computer-science based Headwaters (HWTR 100) section, including Art of Computer Hacking, Computing & Open Spaces, or Let’s Get Physical (Computing). Other Headwaters courses do not count towards this requirement.

Computer Science Core

Students are to select five CU Boulder Computer Science Core courses. Students interested in taking courses currently only offered on the Boulder campus or remotely (as noted below) should consult with their Academic Advisor and the [CU Boulder CSCI Core Courses List](#). Anticipate the following options to be offered in Gunnison.

- CSCI 3002 Fundamentals of Human Computer Interaction (remote, 4 credits)
- CSCI 3202 Intro to Artificial Intelligence (3 credits)
- CSCI 3287 Design & Analysis of Data Systems (3 credits)
- CSCI 3302 Intro to Robotics (remote, 3 credits)
- CSCI 3403 Intro to CyberSecurity for a Converged World (4 credits)
- CSCI 3434 Theory of Computation (remote, 3 credits)

2022 – 2023 DEGREE WORKSHEET

Bachelor of Science in Computer Science

- CSCI 3656 Numerical Computation, or APPM 4600 Numerical Methods and Scientific Computing, or MCEN 3030 Computational Methods (only one of these will count as Computer Science credit, 3 credits)
- CSCI 3753 Design & Analysis of Operating Systems (remote, 4 credits)
- CSCI 4022 Advanced Data Science (3 credits)
- CSCI 4273 Network Systems (remote, 3 credits)
- CSCI 4448 Object-Oriented Analysis and Design (remote, 3 credits)

Computer Science Electives

Students must complete additional upper division computer science (CSCI) courses to bring the total number of computer science credits to 58 hours or more, including CSCI 3022 Introduction to Data Science with Probability and Statistics (3 credits) and CSCI 4622 Machine Learning (3 credits) offered in Gunnison. MCEN 3017 Circuits and Electronics (3 credits) also qualifies with successful student [petition](#) after consultation with an Academic Advisor. Students may choose to complete some electives on the Boulder campus (or remotely) by consulting the [CU Boulder CSCI Upper Division Elective Course List](#).

Senior Capstone

A two-semester senior capstone (beginning in fall and ending in spring) is required for 8 credit hours. This sequence must be taken contiguously and may not be taken before senior year. Prerequisites for a senior capstone include the successful completion of the college writing requirement (Western ENG 302), as well as the computer science foundation, core, and elective courses as listed in the plan of study, to reach a minimum of 36 computer science credit hours.

Grade Requirements

The minimum passing grade for prerequisite and co-requisite classes for computer science majors is a C-. This includes courses completed outside the program. A grade of C- or better is required in each Computer Science Foundation course, as well as in each course used to satisfy the Computer Science Core and the Computer Science Capstone. A grade of C- or higher is needed in all prerequisite courses to take a subsequent course. **The minimum passing grade for standalone classes is a D-.** Per [CEAS Academic Expectations and Policies](#), if the minimum required grade in a prerequisite course is not achieved, the student is required to repeat the course until the minimum acceptable grade has been earned (maximum of 3 attempts total). If a student takes the advanced (post-requisite) course, it does not remove the obligation to meet the prerequisite course minimum grade requirement, even if the grade earned in the advanced course is acceptable. To remain in good academic standing, students must maintain a **cumulative CU Boulder GPA of 2.00**. In addition, students need to have a cumulative and **major GPA of at least 2.00** to graduate from the CU Boulder College of Engineering. Details specific to Computer Science can be found under [Additional Policies and Requirements](#).

Taking Courses in Boulder or Remotely

Students considering taking main campus courses in Boulder (including remote courses) to fulfill degree requirements should be aware that these classes may incur [additional student fees](#), since partnership students taking courses in Gunnison pay a [reduced fee structure](#). Tuition discount programs (ex. Western Undergraduate Exchange and Central Plains) do not apply. Online classes (which are different than remote classes and usually offered through Continuing Education) generally do not incur the same additional fees.

2022 – 2023 DEGREE WORKSHEET Bachelor of Science in Computer Science

Free Electives

College-level coursework accepted by CU Boulder not used otherwise to satisfy degree requirements. Computer science does allow courses counting as free electives to be taken on a pass/fail basis ([however the college limits use to 6 per semester and 16 cumulative](#) and students must first submit a petition prior to choosing this option). Use www.transferology.com to verify that courses will transfer to CU Boulder as appropriate equivalencies.

Coursework Not Accepted for Transfer Credit

All courses will undergo a transfer evaluation and the credit be transferred to CU Boulder as applicable. The following coursework will not be accepted for transfer credit and will not count toward a degree at CU Boulder, as described in the [Campus Transfer Credit Policy](#):

- any courses in which the grade earned is below a C- (1.70)
- courses identified by CU Boulder as remedial, such as remedial English, mathematics, science and developmental reading
- vocational-technical courses that are offered at two-year and proprietary institutions (exceptions may be granted only by the CU Boulder dean responsible for the student's curriculum)
- courses in religion that constitute specialized religious training or that are doctrinal in nature
- credits earned for work experience or through a cooperative education program
- outdoor leadership education coursework
- credits earned in physical education activity courses
- courses or programs identified as college orientation

Credit hours required for graduation that were earned more than ten years prior to transferring into an undergraduate degree program at CU Boulder may not apply to the completion of a student's graduation requirements.

Students are responsible for making up any difference in credit hours between the transfer credit received and the CU Boulder course. This can happen when students transfer in coursework from an institution on a quarter-system, for example. Furthermore, students must have their Academic Advisor approve how the credit shortfall is made up (based on [ABET](#) and other departmental requirements). Students need to have a minimum of 128 unique non-duplicative, degree applicable credit hours, along with meeting the specified course and other requirements for a specific bachelor's degree program per [CEAS Transfer Credit Policy](#).

Academic Standing

To remain in good academic standing with the College of Engineering and Applied Science, a student must maintain satisfactory academic performance as measured by GPA and progress toward completion of a Bachelor of Science degree. Failure to meet these requirements (including the 2.00 GPA) results in the student being placed on Academic Alert, Academic Recovery, and/or Academic Suspension. Students in this situation should consult their Academic Advisor and review the [Academic Standing Policies](#).

Academic Calendar

Western partnership students adhere to the same calendar as Western students (for holiday breaks, etc.). However, add, drop and withdrawal dates for coursework may differ and can be found on the [CU Boulder Registrar's Website](#).

2022 – 2023 DEGREE WORKSHEET
Bachelor of Science in Computer Science

Petition Process

Students seeking an exception to a [policy or practice](#) (including transfer coursework policies) should first talk to their Academic Advisor and then [submit a petition](#).

[Internship for Credit](#)

Students may receive up to 3 credits of free electives (COEN 3930) for an internship or co-op experience. Students must secure the position prior to completing the application, and have (as well as maintain) a 2.00 GPA. All internships for credit must be full-time (40 hours per week) and a minimum of 300 contact hours are required to receive the 3 credits of free elective. [Students can apply online](#) and questions can be directed to their Academic Advisor or [Sharon Anderson](#) (CEAS Director of Active Learning).
