

Coldharbour Institute

2023-2024 Clark Fellow

Position Description

Background Information:

Coldharbour Institute is a 501(c)3 nonprofit organization. We are a learning laboratory where we demonstrate regenerative living practices that bring health to our bodies, land and communities. It is our mission to educate and empower youth and community members to make an impact in sustainability and regenerative solutions for our community and beyond. We work with students, industry professionals, and community members of all ages to envision a thriving community that is restored, revitalized, and ultimately regenerated through our interactions with the land.

Coldharbour Clark Fellows receive tuition assistance in the form of \$10,000 for the year, split evenly between Fall and Spring semester. June through May, students work with Coldharbour staff in one of the below areas to help advance the work and mission of Coldharbour Institute. Students are expected to commit 10 hours per week in the below areas.

Open to first and second year MEM students, fellows can expect to learn the intricacies of nonprofit work, learn about our regenerative organizational theory, participate in a dynamic, committed, and fun team, and have full access to our wide array of educational and professional development opportunities as well as partnerships.

(1) Applied Sustainability Programs (ASP) Fellow

(a) The Applied Sustainability Fellow's focus will be on developing the Youth Regeneration Corps (YRC). The YRC seeks to provide hands-on career development opportunities for high school students with partners throughout Gunnison County in a variety of disciplines (e.g., conservation, solar energy, regenerative ag, etc).

- (i) Programmatic Design and Development
- (ii) Curriculum Development
- (iii) Networking with Gunnison Valley and global organizations (federal, state, and NGO's)
- (iv) Student Recruitment (Students coming from the Gunnison Watershed School District)
- (v) Grant Writing

(2) Colorado Regenerative Network (CRN) Fellow

- (a) Coordinating Accredited Courses
- (b) Hosting Open Houses
- (c) General CRN Marketing and Social Media
- (d) Secondary duties include assisting in management of the contact list and general feedback

(3) Research Fellow

- (a) Coordinate research at the Coldharbour Ranch
 - (b) Manage StoryMap on website and other science communications
 - (c) Assist in River Watch data collection
 - (d) Assist in communication and recruitment of student partners
- (4) Outreach Fellow
- (a) Social Media content planning and management
 - (b) Newsletter management
 - (c) Assist with organizational outreach and communication strategy

To Apply:
